

Indiana Department of Natural Resources / Division of Water

30 Day Public Notice Report

The Department of Natural Resources is providing this report to satisfy the requirements of the "Procedures Concerning Certain Licenses Act", IC 14-11-4, and its associated administrative rule, 312 IAC 2-3. The application files are available for public inspection at the Division of Water's office in Indianapolis. Please contact the Division's Technical Services Section at (317) 232-4160 or the toll free number 1-877-928-3755 to make an appointment for file review. Photocopies may be made for a nominal charge of \$0.10 per 8 1/2 " X 11" copy.

A pre-action public hearing on an application may be requested by filing a written petition with the Director, Division of Water:

Michael W. Neyer, P.E., Director
Division of Water
Room W264
402 West Washington Street
Indianapolis, Indiana 46204

For a petition to be considered valid it must:

1. Contain the typed or legibly printed name and complete mailing address of each petitioner;
2. Be signed by a minimum of 25 individuals who are at least 18 years old and either reside in the county where the project will take place or own real property within 1 mile of the project site;
3. Affirm that each signatory to the petition satisfies the requirements of item 2; and
4. Identify the application for which the public hearing is being requested either by the application # or the applicant's name and the project description.

A petition which does not meet these requirements will be considered invalid and the hearing request will not be granted.

A person may request that the Department provide written notice of its action on an application by filing a written request with:

Division of Water
Room W264
402 West Washington Street
Indianapolis, Indiana 46204

The request must identify the application by either the application # or the applicant's name and the project description.

30 Day Public Notice Report

Application # : FW-23571

Stream : West Fork White River

Applicant : *Division of Fish and Wildlife
James Kershaw
402 West Washington Street, Room W273
Indianapolis, IN 46204

Description : A paved parking area and aggregate pathway will be constructed to allow small watercraft to be carried in to the river. The 50' x 100' parking area will consist of a 185 ton, 6" base using #53 crushed stone and a 123 ton, 4" layer of asphalt, with 6" x 6" posts around the perimeter. The 8' wide footpath will extend approximately 600' from the parking area to the river and will be comprised of 240 tons, 6" base of #53 crushed stone. The footpath will be placed along the northeast property line to reduce the impact on native vegetation. Details of the project are contained in information and plans received at the Division of Water on October 14, 2005.

Location : Along the east side of Riverwood Avenue, beginning approximately 1200' northeast of the intersection of 206th Street and Riverwood Avenue, extending east approximately 300', then southeast 300' to the river
DOWNSTREAM: near Noblesville, Noblesville Township, Hamilton County
SE¼, Section 16, T 19N, R 5E, Riverwood Quadrangle
Quad Code: 4008518
UTM Coordinates: Downstream 4438005 North, 587790 East
UPSTREAM:
UTM Coordinates: Upstream 4438085 North, 587620 East

Statute/Rule : Flood Control Act, IC 14-28-1, with the associated Flood Hazard Area Rule, 312 IAC 10

30 Day Public Notice Report

Application # : FW-23572

Stream : Unnamed Tributary Prairie
Ditch

Applicant : Miami County Commissioners
C. Craig Boyer
25 North Broadway
Peru, IN 46970-2277

Description : The existing, pre-stressed box beam bridge carrying Lover's Lane over Unnamed Tributary Prairie Ditch will be replaced with a new culvert. The new culvert will consist of a 6'-1" x 19'3" x 50' corrugated aluminum box culvert. The culvert will have projecting ends and they will have upstream and downstream inverts of 663.77', NGVD and 663.26', NGVD, respectively. The culvert will be skewed 32 degrees to align with streamflow. The structure will have an out-to-out length of 50' and a clear roadway width of 20'. The existing structure will be completely removed. Minor channel shaping will occur both downstream and upstream of the crossing to provide a better flow transition into and out of the culvert system. The shaping will be confined to the construction right-of-way and temporary right of way downstream. The shaped areas will be lined with an 18" thick layer of riprap placed over geotextile fabric. The approach roads will be constructed on fill placed to a maximum height of 1' over the existing roadway elevations. The crown of the roadway over the culverts will be at 672.8', NGVD. Details of the project are contained in plans and information received at the Division of Water on October 17, 2005.

Location : At the Lover's Lane Road crossing
near Peru, Peru Township, Miami County
SE¼, SW¼, SW¼, Section 15, T 27N, R 4E, Peru Quadrangle
Quad Code: 4008671

30 Day Public Notice Report

Application # : FW-23573

Stream : Little Laughery Creek

Applicant : City of Batesville
Randy Gibbs
132 South Main Street
Batesville, IN 47006-1345

Description : Approximately 240' of the streambank will be stabilized with A-Jacks blocks and Armorloc blocks. Fill will be placed over the blocks to reconfirm the slope to 1.5:1. Also turf reinforcement mats will be placed on the slope for revegetation. Details of the project are contained in information and plans received at the Division of Water on October 19, 2005.

Location : along the east bank, beginning approximately 200' extending 900' north of Underpass Road
DOWNSTREAM: near Batesville, Ray Township, Franklin County
NW¼, SE¼, SE¼, Section 24, T 10N, R 11E, Batesville Quadrangle

30 Day Public Notice Report

Application # : FW-23576

Stream : Fall Creek

Applicant : Urban Elite Properties, LP
501 Indiana Avenue
Suite 70
Indianapolis, IN 46202

Description : A commercial facility will be developed along Fall Creek Pkwy. which is on the north bank of Fall Creek to provide neighborhood retail businesses. The facility consists of two (2) 50' by 112' retail buildings and parking area constructed on redeveloped commercial zoned ground. All work on this site even though partially shown in the floodway is above the base flood elevation according to existing topography. The published base flood elevation does not appear to cross Fall Creek Pkwy. in this area even though it is mapped to be a part of the floodway/flood plain. The proposed finished floor elevation will be 714.00 NGVD (BFE=710.2 approx.). The parking area will be constructed with finished elevations ranging between 712.3 to 713.1. Details of the project are contained in information received electronically at the Division of Water on October 20, 2005.

Location : Near north bank of Fall creek at the intersection of Central Ave. and Fall Creek Parkway
near Indianapolis, Center Township, Marion County
Section 18, T 16N, R 3E, Indianapolis West Quadrangle
Quad Code: 3908672

Statute/Rule : Flood Control Act, IC 14-28-1, with the associated Flood Hazard Area Rule, 312 IAC 10

30 Day Public Notice Report

Application # : FW-23578

Stream : Wabash River

Applicant : Carroll County Board of Commissioners
Ramzi Awwad
616 East Elizabeth Street
Flora, IN 46929-1719

Description : The existing Carroll County Bridge No. 132 (Carrollton Bridge) carrying Carrollton Road over the Wabash River will be rehabilitated on the same alignment to correct substandard geometry and safety features. Work in the floodway will consist of the construction of a temporary work causeway on the immediate east side (upstream) of the bridge. Materials used for the causeway will consist of clean, granular backfill material. The causeway will be constructed in 2 phases - entering from the north bank to a distance approx. 250' south and then from the south bank to a distance approx. 250' north. The width at the top of the causeway will be 10' and widening to 32' at the flowline assuming 1:1 slopes. Only one phase of the causeway will be in place at any given time during construction. No bank shaping will occur other than that necessary to construct and access the causeway. Cofferdams will be erected and water pumped from the voids to correct scouring under and around the piers. An approximate area of 43' x 30' around the existing piers will be excavated and replaced with riprap to match the original flowline elevations; therefore, the existing and proposed channel cross sections will be the same. A total of 0.13 acre of the channel will be disturbed for excavation of fill and placement of riprap around the piers. The structure is a 6-span reinforced concrete arch bridge with span lengths of 89'-10", 96'-9", 2 @ 100 ft, 96'-9", 89'-10". The structure will retain an out-to-out length of 575' and the clear roadway width of 20' will be increased to 24'. The spill through abutments will have 2.5:1 sideslopes armored with riprap. The piers are skewed 0 degrees to align with the streamflow. The existing approaches will be retained. The project is federally funded. Details of the project are contained in information received electronically at the Division of Water on October 24, 2005.

Location : At the Carrollton Bridge (Carroll County Bridge No. 132) carrying Carrollton Road over the Wabash River

Application # : PL-20294

Lake : Lake Wawasee

Applicant : Andrew Hardie
8039 East Cherokee Road
Syracuse, IN 46567-8759

Description : A new seawall will be constructed across 100' of the 100' frontage of the applicant along a Lake Wawasee channel to deter shoreline erosion. The wall will consist of concrete which will be sloped on the lakeward side. It will be 30" - 40" inches high and will vary uniformly in thickness from 36" to 24" from the base to the top. The lakeward face of the wall will be at the legal shoreline. A 24" wide layer of glacial stone will be placed at the base of the wall for toe protection. Details of the project are contained in information received electronically at the Division of Water on October 26, 2005

Location : 8039 East Cherokee Road
near Syracuse, Turkey Creek Township, Kosciusko County
